## Cost-effective options

Fascia covers complete the look of your new roof giving it that visual appeal and has many added benefits including; preventing timber deterioration, deters pests whilst having no disruption to your eaves and there is no need to paint..

# Insulation

---

## Create energy efficiency with a roof blanket

Adding insulation to your new roof can help improve energy efficiency by preventing heat loss in the winter and heat gain in the summer. This helps reduce the workload on your heating and cooling system, saving you money in the long-run!

### Create energy efficiency with a solar roof vent

Adding proper roof ventilation can help improve energy efficiency by allowing hot air to escape from your home. This helps reduce the workload on your heating and cooling system, saving you money on your energy bills instantly!

This solar roof vent is thermostat-controlled, switching on when the roof temperature reaches 28 degrees.

## Customer Testimonial

---

"My wife and I are extremely happy with the new look and would highly recommend Roof & Render to anyone that's looking for a quality job. Although they weren't the cheapest, they were competitively priced. They delivered what they promised and kept us informed along the way which was refreshing after recently dealing with some tradespeople that didn't communicate at all"

Paul and Andrea

## Customer Testimonial

We are both quite thrilled with the result. It has dramatically changed the look, feel and street appeal of our home. They have been approachable, direct and always ready to come to a solution (often in person) which made a real difference to our experience. Thanks Roof & Render SA. 10 out of 10 in our books."

Clinton and Dana

## Customer Testimonial
