Tongue and Groove

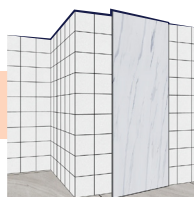

Our wet wall panels connect together side-by-side via tongue and groove, no need for an h-trim or sealant. This creates a waterproof barrier.

Trim is still required for corners

Shower, Bathroom or Any Room

If you're just after a shower reno, no problem, these panels are perfect for the job. They can also be used around the entire bathroom, in your laundry room or in many other applications.

Can Apply Over Most Surfaces

You can apply the panels directly over tiles, plasterboard, cement and many other surfaces. As long as there's enough surfaces area to stick to, the panels will stay put.

WPW®

SCANDIPANEL WALL PANELS

Enhance your space with WPW® Oak Wall Panels, offering a Scandinavian-inspired oak finish and durable SPC technology. Perfect for feature walls, these easy-to-install, scratch-resistant panels maintain a pristine look with low maintenance.

Weight

13kg per panel

Elevate your space with WPW® Scandipanel Wall Panels, where Scandinavian design meets modern innovation. This distinctive panel showcases a meticulously etched vertical slat pattern that perfectly captures the essence of Nordic timber architecture. The warm, natural oak tones combined with precise linear grooves create a contemporary statement that works seamlessly with our entire WPW® Pro range for unlimited design possibilities.

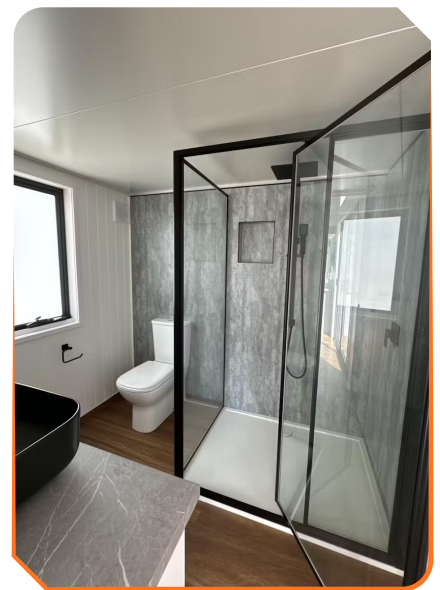

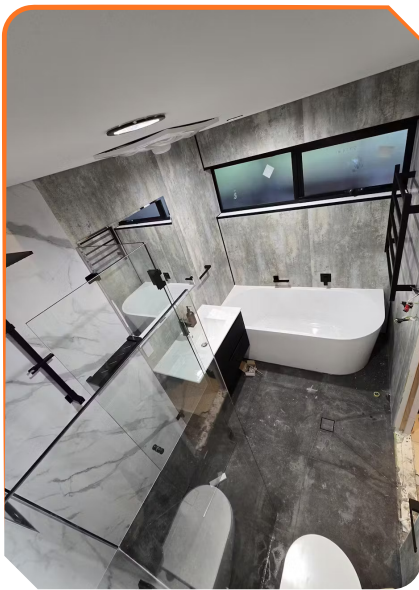

Built on the same professional-grade Stone Polymer Composite (SPC) technology as our WPW® Pro collection, these panels deliver exceptional durability with designer appeal. The impact and scratch-resistant surface maintains its beauty in both residential and commercial settings, while offering the sophisticated look of timber slat walls without the maintenance concerns.

WPW®

PVC WET WALL PANELS

We have a stunning range of PVC bathroom wall panels in a variety of finishes. They are floor-to-ceiling wall panels that are usually used in a bathroom and shower area, but can be used in any high humidity room. If you want to re-surface your shower enclosure as part of a bathroom renovation, shower wall panels are a cost effective and easy-to-install option.

Our standard wet wall panels are made from PVC and they lock tightly using tongue-and-groove technology to create a smooth and seamless finish. They come in full floor-to-ceiling pieces that are easy to lock into place.

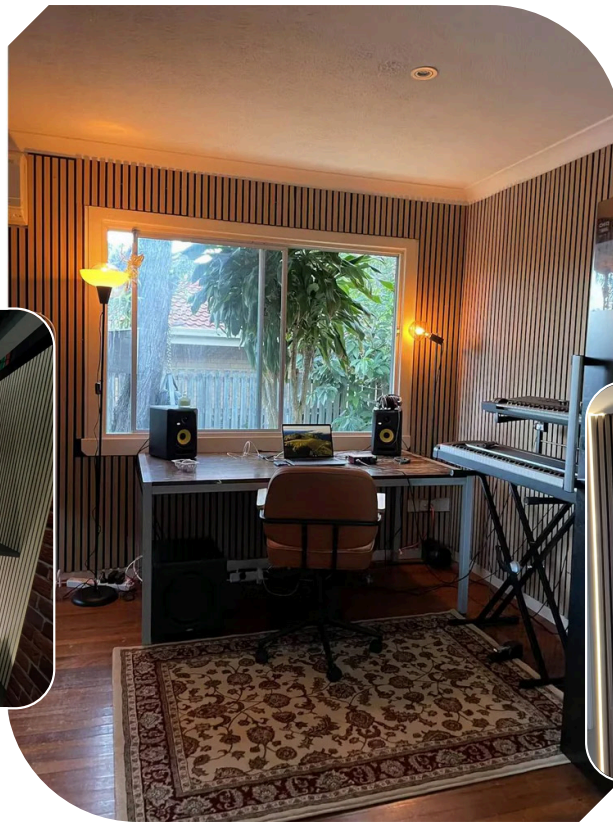

Installation is a fraction of the time it takes to tile, so they're a great alternative for DIY and bathroom renovators alike. Their wipe-clean surfaces ensure your bathroom or other wet space remains looking polished and spotless. No more grout to clean!

WPW®

WOOD VENEER WALL PANEL

Add warmth and a natural touch to your home or office with wooden wall panels. These panels can cover entire rooms or create stylish feature walls, enhancing any space with character. Beyond their beauty, wood veneer panels provide excellent sound and temperature insulation, reducing noise and creating a quiet, private atmosphere. Durable and low-maintenance, these wood veneer panels are also easy to install, making them ideal for DIY projects.
